Hello, All.

Thank you, so much for attending the Wednesday (July 8) WhatsApp Workshop. Here is the additional information we talked about.

Downloading Apps

Tutorials for Apple (iOS) and Android and More from Senior Planet

*Note: the first two tutorials are about downloading apps, but there are other tutorials on the web page that might be of interest as well.

<https://seniorplanet.org/videos/#Apps>

WhatsApp Tutorials

How to sign up for WhatsApp from Senior Planet (Video Tutorial)

Zoom Meeting Control Tips

Geeks on Tour: How Do I Join a Zoom Meeting with a Smartphone?

<https://www.youtube.com/watch?v=iVb9nBu1Sug>

Zoom Controls for iPads, iPhones and other Smart Devices from Zoom

<https://support.zoom.us/hc/en-us/articles/200941109-Attendee-Controls-in-a-Meeting>

Note: You have to click on the topic title on the webpage to see the (hidden) information. Below is a screen shot of the webpage.

The screenshot shows the Zoom Help Center page for the article 'Attendee controls in a meeting'. The page includes a navigation menu on the left with categories like 'Getting Started', 'Zoom Phone', and 'Account & Admin'. The main content area has an 'Overview' section explaining that attendees have limited controls compared to hosts. Below this is a 'Prerequisites' section listing the Zoom desktop client for macOS, Windows, or Linux, and the Zoom mobile app for iOS or Android. There are also buttons for 'Windows', 'Mac', and 'Linux' to download the desktop client, and buttons for 'Web', 'Android', and 'iOS' to download the mobile app. At the bottom, there is a 'Was this article helpful?' feedback section with two thumbs-up/down icons.

Survey and Other Links

How to send a text to another person's email inbox

This is an incredibly easy process, as long as your service plan allows you to send MMS (picture or data rich) messages. If you have the most bare-bones text messaging plan, then you might not be able to send MMS messages. However, rather than hopping on your service provider's site and spending half an hour trying to determine if your plan includes MMS messaging, the fastest way to figure things out is to do a quick test.

To send a text to an email address, compose a text like you normally would, and enter the desired email address into the box where you would normally put a phone number. It's that easy. Try sending one to yourself first to see if it works. If it does, great. If your text doesn't appear in your inbox after a reasonable amount of time, there's a chance that your mobile plan doesn't include MMS messaging, but this is rather unlikely.

I have not been able to find out any information on whether you can save the chat on an iPad. I don't see how to do this or any web pages describing the ability to do this on an iPad or iPhone, so I suspect this cannot be done. It is not clear exactly where it would put the file since not all phones have the Apple Drive app installed on them. It could create a Note I suppose but see no evidence that this is possible. You can hold your finger on an individual chat item to copy it but I don't see a way (yet) to do this for multiple items. Please let me
